SUMMARY

Final-year B.Tech Computer Science student and passionate Python developer with a strong foundation in backend development and RESTful APIs. Focused on creating efficient, scalable solutions and continuously improving technical skills to solve real-world problems.

EDUCATION

United Institute of Technology <i>B.Tech in Computer Science and Engineering</i> — CGPA: 8.1	<i>Prayagraj, India</i> 2022 – 2026
D.C. Lewis Memorial School <i>Intermediate (ISC)</i> — 78.2%	<i>Sonbhadra, India</i> 2021 – 2022
D.C. Lewis Memorial School <i>High School (ICSE)</i> — 78.0%	<i>Sonbhadra, India</i> 2019 – 2020

TRAINING & EXPERIENCE

Summer Intern — Hindalco Industries Ltd. (Aditya Birla Group)	<i>Jul – Aug 2025</i>
- Developed a smart predictive model using machine learning to analyze operational datasets. - Performed data cleaning, preprocessing, and feature engineering to improve prediction performance.	
Python for Data Science Training — United Institute of Technology	<i>Aug – Sept 2023</i>
- Applied Python libraries such as Pandas and NumPy for data cleaning and preprocessing. - Handled missing values and performed data transformation for analysis and visualization.	

PROJECTS

ConvoMind AI — Intelligent Chatbot Web Application	<i>2026</i>
<i>Technologies: Python, Django, JavaScript, HTML, CSS, OpenRouter API, PostgreSQL, Render</i>	
- Developed a full-stack AI chatbot using Django with secure OpenRouter API integration. - Built customizable AI personas with support for dynamic user-defined system instructions. - Deployed on Render using Gunicorn, WhiteNoise, and PostgreSQL for production.	
Live Chat App — Real-Time Chat Application	<i>2026</i>
<i>FastAPI, React, WebSocket, Tailwind CSS, Render, Vercel, GitLab CI/CD</i>	
- Developed a scalable real-time chat app with multi-room WebSocket architecture. - Built multi-room system (500+ rooms, 50 users/room) with live tracking and timestamp sync. - Deployed using Render & Vercel with CI/CD pipeline.	
Type-2 Diabetes Prediction System — AI-Powered Health Risk Web App	<i>2025</i>
<i>Technologies: Python, Flask, scikit-learn, MongoDB, HTML, CSS, JavaScript, Gmail SMTP</i>	
- Created a Flask-based ML web app using a Gradient Boosting model for health data prediction. - Integrated MongoDB and implemented secure authentication using Gmail SMTP OTP. - Engineered clinical features (BMI, Glucose, Insulin) into a 17-feature optimized pipeline.	

CERTIFICATIONS

Internship Certificate — Hindalco Industries Ltd.	<i>2025</i>
Python & Django Framework — Udemy	<i>2024</i>
Python for Data Science — United Institute of Technology	<i>2023</i>

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript
Frontend Technologies:	HTML, CSS, JavaScript, React
Backend Technologies:	Django, Flask, FastAPI, REST APIs
Databases:	MongoDB, PostgreSQL, SQLite
Machine Learning:	Scikit-learn, Exploratory Data Analysis, Feature Engineering
Tools & Platforms:	Git, GitHub, Jupyter Notebook, VS Code, Render, GitLab
