SUMMARY

Full-Stack Developer proficient in building end-to-end scalable web applications using Python (FastAPI, Django, Flask) and React. Skilled in developing real-time web applications via WebSockets, building RESTful APIs, deploying ML-powered applications, and reducing API latency using Redis caching and PostgreSQL.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C

Frameworks & Libraries: Django, FastAPI, Flask, React.js, Node.js, Pandas, NumPy, Scikit-learn, SQLAlchemy

Databases: PostgreSQL, MongoDB, SQLite, SQL, Redis

Web Technologies: HTML5, CSS3, Tailwind CSS, REST APIs, WebSockets, JWT

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Render, Vercel, GitLab CI/CD, Railway

TRAINING & EXPERIENCE

Intern | Hindalco Industries Ltd. | <https://www.hindalco.com>

Jul 2025 – Aug 2025

- Developed Python-based data pipelines, integrating ML models with backend APIs.
- Automated data preprocessing using Pandas and NumPy, reducing manual preprocessing time.
- Engineered features and evaluated Scikit-learn models to optimize operational forecast accuracy.

Summer Training | United Institute of Technology | <https://united.ac.in>

Aug 2023 – Sept 2023

- Hands-on training in Python programming, applied to data preprocessing and EDA using Pandas/NumPy.
- Applied Python to build data processing workflows and automate repetitive tasks.

PROJECTS

Live Chat App | Real-Time Chat Application

live-chat-app-rho.vercel.app

Scalable real-time communication platform with WebSocket-based multi-room chat and integrated AI chatbot.

- *Tech Stack:* Python, JavaScript, React, FastAPI, WebSockets, Tailwind CSS, OpenAI API, GitLab CI
- Built a real-time chat system supporting 500+ rooms and 50 users/room using WebSockets and in-memory state.
- Developed an AI Chatbot Studio with 4+ personas, integrating Gemini & OpenRouter APIs using async requests.
- Built a 2-stage GitLab CI/CD pipeline for Vite build verification and Python syntax checks.

WorkNest | Team Collaboration & Project Management Hub

worknest-qupz.onrender.com

Collaborative project management platform with role-based access, task tracking, and interactive dashboards.

- *Tech Stack:* Python, Flask, Jinja2, PostgreSQL, SQLAlchemy, JWT Auth, JavaScript, Redis, Gunicorn
- Built a project management platform enabling task assignment, progress tracking, and team collaboration.
- Implemented secure stateless JWT authentication with 2-tier RBAC (Admin/Member) for protected endpoints.
- Integrated Redis in-memory caching for analytical dashboard queries, reducing API response latency by ~ 45%.

Type-2 Diabetes Prediction System | AI-Powered Healthcare Web App

[Live Link](#)

ML-powered diabetes risk prediction app using clinical health parameters and predictive analytics.

- *Tech Stack:* Python, Flask, Scikit-learn, MongoDB, HTML, CSS, JavaScript, Gmail SMTP
- Built an ML application predicting diabetes risk via 8 parameters, achieving 91% accuracy with Gradient Boosting.
- Implemented authentication with Werkzeug hashing and 6-digit OTP via Gmail SMTP, with 5-minute expiry.
- Performed feature engineering and preprocessing on clinical data to improve prediction performance.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

United Institute of Technology, Prayagraj | CGPA: 8.26

CERTIFICATIONS

Internship Certificate – Hindalco Industries Ltd. (Aditya Birla Group) | [\[View Certificate\]](#)

2025

Python & Django Framework – Udemy | [\[View Certificate\]](#)

2024

Python for Data Science – United Institute of Technology | [\[View Certificate\]](#)

2023
