SUMMARY

Full-Stack Developer with hands-on experience building scalable web applications, REST APIs, and AI-powered solutions using Python, Django, FastAPI, Flask, React.js, and PostgreSQL. Skilled in backend development, database design, authentication, WebSockets, and deploying production-ready applications.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C

Frameworks & Libraries: Django, FastAPI, Flask, React.js, Node.js, Pandas, NumPy, Scikit-learn

Database: PostgreSQL, MongoDB, SQLite, SQL

Web Technologies: HTML5, CSS3, JavaScript, Tailwind CSS, REST APIs, WebSockets, JWT

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Render, Vercel, GitLab CI/CD, Railway

TRAINING & EXPERIENCE

Summer Intern | Hindalco Industries Ltd. | <https://www.hindalco.com> Jul 2025 – Aug 2025

- Worked on Python-based data analysis and machine learning concepts for operational datasets.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy.
- Applied data analysis techniques to generate actionable insights for decision-making.

Python for Data Science | United Institute of Technology | <https://united.ac.in> Aug 2023 – Sept 2023

- Utilized Pandas and NumPy for data preprocessing, cleaning, and transformation of structured datasets.
- Conducted exploratory data analysis (EDA) and visualization to identify trends and patterns.
- Implemented machine learning workflows including feature selection and model evaluation techniques.

PROJECTS

Live Chat App — Real-Time Chat Application live-chat-app-rho.vercel.app

Scalable real-time communication platform with WebSocket-based multi-room chat and integrated AI chatbot studio

- *Tech Stack:* Python, JavaScript, React, FastAPI, WebSockets, Tailwind CSS, OpenAI API, GitLab CI
- Built a real-time chat application using FastAPI and WebSockets, handling 500+ rooms with in-memory sessions.
- Integrated an AI chatbot with switchable personas using OpenAI API integration for customizable AI conversations.
- Automated CI/CD pipeline using GitLab CI for Vite build verification and Python syntax checks.

WorkNest — Team Collaboration & Project Management Hub <https://worknest-qupz.onrender.com>

Collaborative project management platform with role-based access, task tracking, and interactive dashboards.

- *Tech Stack:* Python, Flask, Jinja2, PostgreSQL, SQLAlchemy, JWT Auth, JavaScript, Gunicorn
- Built a full-stack project management platform enabling task assignment, progress tracking, and team collaboration.
- Implemented JWT authentication and role-based access control with PostgreSQL-backed data management.
- Designed responsive dashboards with project analytics, task progress visualization, and role-specific views.

Type-2 Diabetes Prediction System — AI-Powered Healthcare Web App [Live Link](#)

ML-powered diabetes risk prediction app using clinical health parameters and predictive analytics.

- *Tech Stack:* Python, Flask, Scikit-learn, MongoDB, HTML, CSS, JavaScript, Gmail SMTP
- Developed a machine learning application for diabetes risk prediction using Gradient Boosting.
- Implemented secure authentication and OTP verification workflow.
- Performed feature engineering and preprocessing on clinical data to improve prediction performance.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2022 – 2026

United Institute of Technology, Prayagraj — CGPA: 8.26

CERTIFICATIONS

Internship Certificate – Hindalco Industries Ltd. (Aditya Birla Group) [Link](#) 2025

Python & Django Framework – Udemy [Link](#) 2024

Python for Data Science – United Institute of Technology [Link](#) 2023
